Art Unit: 3714

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 18 November 2006 has been entered.

Allowable Subject Matter

- 2. Claims 1-54 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: A thorough search of the prior art fails to disclose any reference or references, which, taken alone or in combination, teach or suggest, in combination with the other limitations, separating input and output streams at an application layer of a protocol stack and redirecting the input output streams over the communications pathways to the client/terminal computers via the server/host interface program and the client/terminal program. As described in Applicant's specification (See Col 5, 50-65 of the parent patent), this means that the application program on the server/host directly interprets player input. James et al. (US Patent Number 5,964,660) teaches a system where the browser on the client/terminal first processes input before sending it to the server/host.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
